THE HIGH TECH TEAM

*The bond between
Industry and
University grows
stronger in the
Computer Age.*

Page 4

In This Issue

The CASE Center opened in early 1984 with grand, speculative rhetoric on 21st-century research and the eventual rebirth of the upstate economy—the stuff of press releases.

Early this year, as the CASE Center quietly completed its third year in business, we asked writer Betsy Amster to find out whether the center had begun to fulfill its mission: to pioneer new computer applications with the enthusiastic, wallets-open interest of industry.

Happily, the answer is yes. In her story (beginning on page 4), Amster shares a glimpse of the projects that bring industry and SU together on the high-tech frontier. The list is exemplary, not comprehensive; collaborative research has grown so quickly that a full study would fill volumes.

FEATURES

The High-Tech Team

4

Industry and University have learned that, when the cost and complexity of computer-related research come to bear, two heads are better than one. *By Betsy Amster.*

Faster Than Fast

16

The federal government has asked SU to help perfect the next generation of high-speed computers. *By Betsy Amster.*

Pilots and Pioneers

18

Among the many Syracuse alumni in technology are these eight—key movers and motivators in the search for tomorrow's great ideas. *By Alexandra Eyle.*

1950–1970: Golden Age of Research

26

Spurred on by the tenor of the times and an opportunistic chancellor, Syracuse became a major research university in the fifties and sixties. *By Alexandra Eyle.*

DEPARTMENTS

30 University Place. Campus news of the spring and summer included the new parallel computing center and, of course, SU's day in the national sports spotlight.

38 Quotables. Campus speakers Nader, Spock, Yankelovich, and Leibler served up some food for thought during the spring semester.

40 SU's Who. Stories of Syracuse success include the man behind the home-shopping craze and a writer who put words in the mouth of a mouse. *By Mary Ellen Mengucci.*

44 State of the Arts. The age-old tradition of horse portraiture includes only two legendary names. One belongs to alumnus Richard Stone Reeves. *By Sherry Chayat.*

46 Scouting Report. Five years into his NFL career, Joe Morris has proven the relative importance of height and heart. *By Rich Cimini.*

48 "In" Basket. Readers respond to our February 1987 remembrance of the G.I. Bill days.

The Cover. Illustrator Chris Moeller captures the spirit of industry-University collaboration. See page 4.
